

Installation kit includes

- Hex key 4mm (1)
- Bolt M6 x 25mm
- Slotted spool (1)
- Nylon washer (1)
- Bolts 8mm (2)

Yamaha Royal Star TD 2005 and UP Ultimate seats Installation

Your new passenger seat has the connecting bracket already installed.

Do not remove the connecting bracket from the passenger seat.

#1. Remove original passenger seat attachment bracket from the rear fender - (3 bolts)

#2. Install the supplied spool – using the supplied screw (4mm Hex key) into the center threaded hole in the fender where you removed the original bracket.

The nylon washer must be under the spool, between the spool and the fender.

#3. Now you can install the Ultimate passenger seat, the front passenger seat bracket goes over the spool and then slides forward to lock in.

#4. Line up the rear bracket hole with the original threaded hole in the fender and install the original bolt.

#5. Now you can install your rider seat, make sure you have the rear locator bracket on the seat correctly into the rear fender bracket locator and then push down on the front of the seat and install the 2 new supplied bolts.

Enjoy the ride again
